DESCRIPTION

The **XL Impact Cart** is an optional, standalone impact conveyor cart designed to protect your conveyor investments that are exposed to high volume and/or high impact loading or unloading. Using the **XL Impact Cart** at the in-feed end of your conveyor system will help protect the life of your flexible conveyor and reduce overall maintenance costs.

The **XL Impact Cart** is perfect for both loading and unloading applications and is a larger and heavier duty cart than standard industry versions. Customers can order this cart as gravity or powered, with powered versions offering several additional options: reversing or accumulation, LED lights, and operator controls. Using the FMH Connect Kit, the **XL Impact Cart** retrofits to existing power and gravity flexible conveyor systems not already equipped with an impact cart.

FMH CONVEYORS IS A MEMBER OF THE **DURAVANT** FAMILY OF COMPANIES
